**FOR SALE.**  
✓ **WINDMILL AND WATER POWER** in  
the city of Bangor and on navigable water.  
Owing to ill health will be sold a portion, say  
undivided moiety of the whole of the valuable

property situated at Brewer Village, on both sides of the large Corv on Brewer stream, well known as the best stream of its size running into the tributary river fed by a chain of ponds and five springs one of mud ponds which is commanded these mills, is from three to four miles long and contains over 2000 acres of water. The stream is never known to fail of a fair head of water, and is much improved by dams &c. The mills erected are in good order, consisting of a good saw mill rents for \$1500 per annum, and a grist

The year round they are two miles south of Bannock at the head of the Cove, perfectly free from the risk of freshet by stream or river, was produced the present season. There is sufficient water power to turn breast wheels on this dam for 6 sams, with their half up and circular for cutting shals : which will saw from five to six millions feet per annum. Vessels load at the mill wharf and the labor may be assorted at the saw.

There is also a fall of water in said Cove between the State Mills, which has been measured by

experienced Mill Wrench, who is responsible, ready to contract to erect a dam and bridge at a place of 22 ft. with 10 gates which shall use water of the stream over again run mills on the turbine or other suitable means 18 hours in the day. A doubtless my mill and the first mill may be placed here at small expense and it is improvement to add such otherwise to the profit of the water estate. There is a good house store and hired and many fine trees lots for wharfing short, no property of the land in or about

growing city of Banvor is more available, or I may derive more income upon an outlay of a few thousand dollars than this—it is virtually within the grasp of any man, and must increase in value with the growth of the city. It has many other privileges being one of the best locations in England for ship building, and ere long will become a manufacturing village.

For terms and all other information application may be made to SAMUEL THATCHER, JR. in my town, or upon the premises of GEO. A. HATCHER of the City of New York. SAMUEL THATCHER
